CRUZ CREATIVE

BRAND GUIDELINES

Big ideas. Bold content. Zero fluff.

Tenerife, Canary Islands · cruzcreative.net

Version 1.4 — November 2026

BRAND OVERVIEW

WHO WE ARE

Cruz Creative is a social media and video content agency based in Tenerife, Canary Islands, serving brands that want to stand out on Instagram, TikTok, and YouTube.

The brand personality is confident, direct, and results-obsessed — no fluff, no templates, no hand-holding.

"BIG IDEAS. BOLD CONTENT. ZERO FLUFF."

TONE OF VOICE

- **Punchy, imperative, outcome-focused — write like a bold creative director, not a corporate copywriter.**
- **Short sentences. Strong verbs. Fragments are fine.**
- **Lead with the outcome, not the service ("Stop guessing what to post," not "We offer content planning").**
- **Speak directly to the reader — use "you" and "your."**
- **Structure section copy as Problem → Agitation → Solution.**
- **CTAs are action-first and specific: "Plan My Content," "Let's Make Reels" — never "Learn More" or "Click Here."**

LOGO SYSTEM

The Cruz Creative logo pairs a bold, rounded wordmark with a mint outline box — a lockup built for legibility on both dark UI and busy photo/video content.

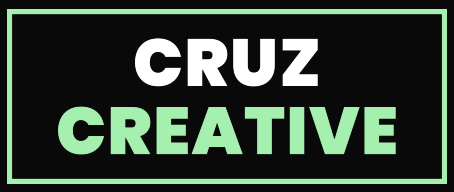

Primary Lockup — Horizontal

Horizontal Lockup

Default version for site headers, nav bars, email signatures, and wide-format placements.

Stacked Lockup

Stacked Lockup

For square or narrow placements — profile headers, packaging, printed materials.

Icon Monogram

Icon Monogram (“CC”)

For favicons, app icons, social avatars, and anywhere the full wordmark won’t fit legibly.

Color & Background Versions

Every lockup ships in two versions:

- **Transparent background — for overlaying on photography, video, or any custom background colour.**
- **Solid dark background (Near-Black #0A0909) — for use on white or light-coloured surfaces where a self-contained card is needed.**

The mint outline sits flush with the outer edge of every exported file — there is no additional border or padding beyond the mint line itself.

Clear Space & Minimum Size

- Maintain clear space around the logo equal to at least the cap-height of the “C” in “CRUZ” on all sides — no other text, logos, or graphic elements should intrude.
- Minimum width for the horizontal lockup: 120px (digital) / 1 inch (print).
- Minimum size for the icon monogram: 32px — below this, legibility of the “CC” suffers.

Do / Don’t

- Do use the approved transparent or dark-background files as provided — never recreate the logo from scratch.
- Do use the icon monogram for small or square placements instead of shrinking the horizontal lockup.
- Don’t recolor the logo outside the approved white / mint (#A5F0B1) combination.
- Don’t stretch, skew, rotate, or alter the proportions of any lockup.
- Don’t add drop shadows, outlines, glows, or other effects.
- Don’t place the transparent version over low-contrast backgrounds where the white “CRUZ” or mint “CREATIVE” would be hard to read.

COLOR PALETTE

Primary Accent

	Mint Green `#A5F0B1`	Logo, primary CTA buttons, icon accents, tick marks, nav Contact button. Never used as a large background fill.

Dark Backgrounds

Near-Black (#0A0909) is the canonical dark background. Surface and Elevated are complementary tints of the same base, for layering UI on top of it.

	Near-Black (base) `#0A0909`	Default background for hero sections, feature callouts, closing CTAs, footer, and the logo's solid-background version.
	Surface `#141212`	One step lighter than base — cards and components sitting on top of the near-black background.
	Elevated `#1E1A1A`	Two steps lighter — hover states, active/selected elements, and anything that needs to visually lift off Surface.

Light Backgrounds

	Off-White `#F5F5F0`	Mid-page content: FAQs, feature breakdowns, "How it works."
	Light Grey `#F0F0F0`	Secondary light surface, alternates with off-white for section rhythm.

Text & Neutral

	White #FFFFFF	The logo's white "CRUZ" only. Use Warm White everywhere else.
	Warm White #F0EADE	Every use of white except the logo: headlines, headings, labels, key lines and button text. Use it wherever pure white would go.
	Light Grey (text) #CCCCCC	Paragraph and body text on dark backgrounds.
	Charcoal #333333	All text set on light backgrounds.

TYPOGRAPHY

Primary Typeface — Montserrat

Montserrat is used throughout the design — headings, body copy, and lists all share this one family, differentiated by weight:

- **Hero / H1 — Extra Bold (800), largest size in the type scale**
- **Headings (H2) — Extra Bold (800), same weight as H1, smaller size**
- **Paragraphs — Regular (400)**
- **Lists / bullet points — SemiBold (600)**

H1 and H2 share the same Montserrat Extra Bold weight — the only difference between them is font size, not weight.

Logo Wordmark — Exception

Poppins Black (900) is used exclusively for the logo lockups. It does not appear anywhere else — not in headlines, body copy, or UI text.

Optional Secondary Font — Idea Only

Montserrat alone comfortably covers every role in the system, so a second typeface isn't required and none is adopted here. As an idea worth keeping on file: if a complementary face is ever wanted for a specific moment — stat call-outs, proof numbers ("9:16," "3x," "400K views") — Space Grotesk could work well. It's a geometric grotesk with distinctive numerals that pairs cleanly with Montserrat without competing with it, and adds a slightly more technical edge to data-driven moments. Nothing to action — just an idea for later if the need comes up.

QUICK REFERENCE

Hex Codes

	Mint (primary) `#A5F0B1`	#A5F0B1
	Near-Black (base) `#0A0909`	#0A0909
	Surface `#141212`	#141212
	Elevated `#1E1A1A`	#1E1A1A
	Off-White `#F5F5F0`	#F5F5F0
	Light Grey `#F0F0F0`	#F0F0F0
	White (logo only) `#FFFFFF`	#FFFFFF
	Warm White (all other white) `#F0EADE`	#F0EADE
	Body text on dark `#CCCCCC`	#CCCCCC
	Text on light `#333333`	#333333

Fonts at a Glance

- **Hero / H1 — Montserrat Extra Bold, largest size**
- **Headings (H2) — Montserrat Extra Bold, smaller size (same weight as H1)**
- **Paragraphs — Montserrat Regular**
- **Lists / bullets — Montserrat SemiBold**
- **Logo wordmark only — Poppins Black**
- **Space Grotesk — idea only for future stats/data use, not adopted**

Logo Files

- **Horizontal, Stacked, Icon — each in Transparent and Dark-Background (#0A0909) versions**
- **Every lockup also provided as a true vector .svg (text converted to outlined paths — no font install required)**
